Office Action Summary

Art Unit: 1762

Election/Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C.

121:

I. Claims 1-15, drawn to method, classified in class 427, subclass 475.

II. Claims 16-23, drawn to apparatus, classified in class 118, subclass 635.

2. The inventions are distinct, each from the other because of the following reasons: Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the process can be carried out by another and materially different apparatus comprising C-clamps, frames, or clamping means other than hooks to hold articles being conveyed past the sprayer, the clamps/etc coated with a thermally sacrificial tape coating that is burned off after coating is completed.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 1762

4. A telephone call was made to Jack Bryan on 4/4/03 to request an oral election to the above restriction requirement, but did not result in an election being made. *Mr Bryan requested a written restriction*

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Fred J. Parker whose telephone number is (703) 308-3474.
